

Accessibility Statement

Arrington Insurance of Florida Inc.

Last updated: 10/2026

Our Commitment to Accessibility

Arrington Insurance of Florida Inc. is committed to providing an accessible and inclusive website experience for all visitors, including individuals with disabilities. We want people to have meaningful access to information about insurance coverage and our agency's services. Accessibility is an ongoing part of how we develop, review, and maintain our website.

Accessibility Goal

Our goal is to make www.arringtoninsurancefl.com consistent with the Web Content Accessibility Guidelines (WCAG) 2.2 Level AA. This is an accessibility goal, not a representation that the website has been independently audited, certified, or found to conform fully to every success criterion.

Accessibility Considerations

As we build and maintain the website, we consider clear page headings, descriptive text for meaningful images, readable type, color contrast, keyboard navigation, accessible forms, responsive layouts, and compatibility with assistive technologies. We continue to review accessibility as content and features are added or changed.

Assistance and Alternative Access

If you have difficulty reading information, navigating the website, or submitting an online quote request, Arrington Insurance can assist you by telephone or email. We welcome requests for reasonable accessibility accommodations and will work with you to identify an appropriate way to obtain information or access our services. You do not need to use the website form to request assistance.

Reporting an Accessibility Barrier

If you encounter an accessibility issue, please let us know. If convenient, include the webpage address, a description of the difficulty, and any assistive technology or device information you wish to share. You are not required to disclose a disability or provide medical information to report a website barrier. We will review concerns and work toward appropriate solutions.

Third-Party Websites

Our website may link to separately operated insurance carrier websites, payment portals, or other third-party services. Those websites may have different accessibility features and limitations. If you need assistance reaching insurance-related information or services through a third party, please contact our agency and we will try to help identify an accessible way forward.

Ongoing Improvements and Updates

Accessibility is an ongoing effort. We may update our website, accessibility practices, and this statement as needs, technologies, and standards evolve. Any revision will be reflected in the last updated date above.
